

Orlando [Your last name]

Web Developer — Kigali, Rwanda

[your.email@example.com] · [+250 7xx xxx xxx] · github.com/[your-username] · linkedin.com/in/[your-username]

SUMMARY

Web developer and computer science student based in Kigali, building digital products for local businesses across hospitality, food & beverage, retail, and nonprofit sectors. Works end to end — discovery, design, build, payment integration, and post-launch support — with a consistent, production-ready stack.

EXPERIENCE

Freelance Web Developer — Independent, Kigali, Rwanda

[Start year] — Present

- Design, build, and deploy websites for local hospitality, food & beverage, retail, and nonprofit clients across Kigali.
- Run the full project lifecycle: discovery and pitching, wireframes, build, payment integration, and post-launch support.
- Consistent stack: Vue 3 + Vite frontends, Node.js/Express backends, Neon serverless Postgres.

SELECTED PROJECTS

MegaP House & Kiza Foundation 2026

Dual-purpose platform: e-commerce bookstore (MegaP House) with checkout, plus a fully separate, independently routed nonprofit site for the Kiza Foundation with a donation portal.

Vue 3, Vite, Node.js, Express, Neon Postgres, Pesapal

Kigali Clipper Zone 2026

Booking-first barbershop site with a protected admin dashboard and automated confirmation emails.

Vue 3, Vite, Neon Postgres, Resend

Dontez Restaurant 2025

Restaurant site built around a scroll-driven animation sequence and a component-per-section architecture.

Vue 3, Vite, GSAP

Cloud9, Feels, Atelier du Vin, Chris Hotel, Indabo Cafe 2025

Additional Kigali-based hospitality and F&B client sites delivered through a phased build process (discovery, design, build, review, launch).

Vue 3, Vite

Internet Usage — Big Data Pipeline 2026

Full ETL, ML, and dashboarding pipeline against the World Bank's internet-usage indicator, from raw extraction through a Tableau dashboard.

Python, Pandas, NumPy, PostgreSQL, Tableau

EDUCATION

[Your program / degree]

Adventist University of Central Africa — Kigali, Rwanda

[Start year] — Present

- Introduction to Big Data Using Python — ETL pipelines, Pandas/NumPy analysis, Tableau dashboarding
- SENG 8415, Best Programming Practices & Design Patterns — Singleton, Factory, Builder, Adapter, Decorator, Facade, Strategy

SKILLS

Languages	TypeScript, JavaScript, Java, Python, SQL
Frontend	Vue 3, Vite, React, GSAP
Backend	Node.js, Express, Spring Boot, Neon Postgres
Tools & practice	Git/GitHub, design patterns, Tableau, payment integration (Pesapal, DPO Pay)
